Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

Amendments to the Claims:

 (currently amended) A method of producing a vertebrate host mimic for modifying a behavior of arthropods which are parasitic to a vertebrate host, the method comprising the steps of:

providing an artificial lipid based media that is not attractive to arthropods which are parasitic to a vertebrate host;

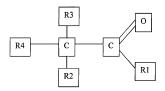

providing microorganisms, the microorganisms being associated with a skin of the host vertebrate and operative to excrete sub-products which modify the media upon combination with the lipid based media to produce modified lipid based media;

combining the <u>artificial</u> lipid based media and the microorganisms; and collecting the modified lipid based media.

- (currently amended) The method of Claim 1 wherein the <u>artificial</u> lipid based media contains a type of lipid found on a skin of the vertebrate host.
- (currently amended) The method of Claim 2 wherein the <u>artificial</u> lipid based media contains a type of lipid found in the gland secretions of the vertebrate host.
- (currently amended) The method of Claim 3 wherein the <u>artificial</u> lipid based media contains a type of lipid found in the sebaceous gland of the vertebrate host.
- (currently amended) The method of Claim 1 wherein the <u>artificial</u> lipid based media is a type of lipid selected from the group consisting of glycerides, sterols, sterol esters, sterol phosphates, sterol precursors, wax, wax esters, wax alcohols, wax aldehydes and combinations thereof.
- (currently amended) The method of Claim 1 wherein the <u>artificial</u> lipid based media is a type glyceride having the formula:

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

wherein R1 is selected from the group consisting of Hydroxy, Alkyloxy, Amino, Alkylamino, Diakylamino, Arylamino, Diaryloxy, Halogen and Cyano; and

wherein R2, R3 and R4 is selected from the group consisting of Hydrogen, Alkyl and Aryl.

- 7. (cancelled)
- 8. (currently amended) The method of Claim 1 wherein the <u>artificial</u> lipid based media is a hydrolyzed lipid.
- (original) The method of Claim 8 wherein the hydrolyzed lipid is selected from the group consisting of C10-C40 fatty acids, fatty alcohols, hydroxyacids and combinations thereof.
- 10. (original) The method of Claim 1 wherein the host skin associated microorganisms are generally distributed over the skin of the vertebrate host.
- 11. (original) The method of Claim 10 wherein the host skin associated microorganisms are resident and transient to the skin of the vertebrate host.
- $12. \hspace{0.2in} \hbox{(original)} \hspace{0.5in} \hbox{The method of Claim 1 wherein the host skin associated} \\ \hbox{microorganisms are capable of producing proteases, lipases, or cellulaeses.}$
- 13. (original) The method of Claim 1 wherein the microorganisms are capable of producing enzymes that hydrolyze lipids.
- 14. (original) The method of Claim 1 wherein the microorganisms are capable of producing enzymes that produce fatty acids.
- 15. (original) The method of Claim 1 wherein the microorganisms are capable of producing enzymes that produce fatty alcohols.

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

16. (original) The method of Claim 1 wherein the microorganisms are capable of producing enzymes that produce fatty aldehydes.

- 17. (original) The method of Claim 1 wherein the microorganisms are capable of producing enzymes that produce hydroxyacids.
 - (original) The method of Claim 1 further comprising the step of:
 e. sterilizing the microorganisms.
- (currently amended) A vertebrate host mimic produced according to the method of Claim 1.
- 20. (currently amended) A trap to ensnare arthropods which are parasitic to vertebrate hosts, the trap comprising:

an arthropod ensnaring device; and

- a vertebrate host mimic disposed adjacent the arthropod ensnaring device, the vertebrate host mimic produced according to the steps of:
 - a. providing an artificial lipid based media that is not attractive to arthropods which are parasitic to a vertebrate host;
 - b. providing microorganisms, the microorganisms being associated with a skin of the host vertebrate and operative to excrete sub-products which modify the media upon combination with the lipid based media to produce modified media;
 - c. combining the <u>artificial</u> lipid based media and the microorganisms;
 and
 - d. collecting the modified lipid based media.
- (original) The trap of Claim 20 wherein the vertebrate host mimic is enclosed within the arthropod ensnaring device.
- 22. (currently amended) A method of producing a vertebrate host mimic for modifying a behavior of arthropods which are parasitic to a vertebrate host, the method comprising the steps of:

providing a lipid based media that is not attractive to arthropods which are parasitic to a vertebrate host;

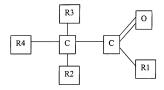

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

providing enzymes, the enzymes being isolated from of a type excreted by microorganisms associated with a skin of the host vertebrate and the enzymes being operative to modify the lipid based media upon combination with the lipid based media to produce modified lipid based media: combining the lipid based media and the enzymes; and

collecting the modified lipid based media.

- 23. (original) The method of Claim 22 wherein the lipid based media contains a type of lipid found on a skin of the vertebrate host.
- 24. (original) The method of Claim 23 wherein the lipid based media contains a type of lipid found in the gland secretions of the vertebrate host.
- 25. (original) The method of Claim 24 wherein the lipid based media contains a type of lipid found in the sebaceous gland of the vertebrate host.
- 26. (original) The method of Claim 22 wherein the lipid based media is a type of lipid selected from the group consisting of glycerides, sterols, sterol esters, sterol phosphates, sterol precursors, wax, wax esters, wax alcohols, wax aldehydes and combinations thereof.
- 27. The method of Claim 22 wherein the lipid based media is a (original) type of glyceride having the formula:

wherein R1 is selected from the group consisting of Hydroxy, Alkyloxy, Amino, Alkylamino, Diakylamino, Arylamino, Diaryloxy, Halogen and Cyano; and

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

wherein R2, R3 and R4 is selected from the group consisting of Hydrogen, Alkyl and Aryl.

- 28. (cancelled)
- (original) The method of Claim 22 wherein the lipid based media is a type of hydrolyzed lipid.
- 30. (original) The method of Claim 29 wherein the hydrolyzed lipid is selected from the group consisting of C10-C40 fatty acids, fatty alcohols, hydroxyacids and combinations thereof.
- (original) The method of Claim 22 wherein the host skin associated microorganisms are generally distributed over the skin of the vertebrate host.
- 32. (original) The method of Claim 31 wherein the host skin associated microorganisms are resident and transient to the skin of the vertebrate host.
- (original) The method of Claim 22 wherein the microorganisms are capable of producing proteases, lipases, or cellulaeses.
- 34. (original) The method of Claim 22 wherein the microorganisms are capable of producing enzymes that hydrolyze lipids.
- 35. (original) The method of Claim 22 wherein the microorganisms are capable of producing enzymes that produce fatty acids.
- 36. (original) The method of Claim 22 wherein the microorganisms are capable of producing enzymes that produce fatty alcohols.
- 37. (original) The method of Claim 22 wherein the microorganisms are capable of producing enzymes that produce fatty aldehydes.
- 38. (original) The method of Claim 22 wherein the microorganisms are capable of producing enzymes that produce hydroxyacids.
 - 39. (original) The method of Claim 22 further comprising the step of:e. sterilizing the microorganisms.
- 40. (currently amended) A vertebrate host mimic produced according to the method of Claim 22.
- 41. (currently amended) A trap to ensnare arthropods which are parasitic to vertebrate hosts, the trap comprising:

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

an arthropod ensnaring device; and

a vertebrate host mimic disposed adjacent the arthropod ensnaring device, the vertebrate host mimic produced according to the steps of:

- a. providing a lipid based media that is not attractive to arthropods which are parasitic to a vertebrate host;
- b. providing enzymes, the enzymes being <u>isolated from</u> of a type exercted by microorganisms associated with a skin of the host vertebrate and the enzymes being operative to modify the lipid based media upon combination with the lipid based media to produce modified lipid based media:
 - c. combining the lipid based media and the enzymes; and
 - d. collecting the modified lipid based media.
- 42. (original) The trap of Claim 41 wherein the vertebrate host mimic is enclosed within the arthropod ensnaring device.
- 43. (currently amended) A method of producing a vertebrate host mimic for modifying a behavior of arthropods which are parasitic to a vertebrate host, the method comprising the steps of:

providing a <u>single</u> lipid selected from the group consisting of glycerides, sterols, sterol esters, sterol phosphates, sterol precursors, wax, wax esters, wax alcohols, and wax aldehydes:

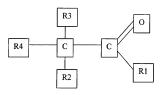

providing microorganisms, the microorganisms being associated with a skin of the host vertebrate and operative to excrete sub-products which modify the media upon combination with the lipid to produce a modified lipid;

combining the lipid and the microorganisms; and collecting the modified lipid.

44. (previously presented) The method of Claim 43 wherein the lipid is a type of glyceride having the formula:

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

wherein R1 is selected from the group consisting of Hydroxy, Alkyloxy, Amino, Alkylamino, Dialkylamino, Arylamino, Diaryloxy, Halogen, and Cyano; and

wherein R2, R3, and R4 are selected from the group consisting of Hydrogen, Alkyl, and Aryl.

45. (cancelled)

46. (currently amended) A method of producing a vertebrate host mimic for modifying a behavior of arthropods which are parasitic to a vertebrate host, the method comprising the steps of:

providing a <u>single</u> lipid selected from the group consisting of glycerides, sterols, sterol esters, sterol phosphates, sterol precursors, wax, wax esters, wax alcohols, and wax aldehydes;

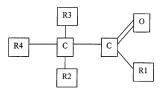

providing enzymes, the enzymes being <u>isolated from</u> of a type exercted by microorganisms associated with a skin of the host vertebrate and the enzymes being operative to modify the lipid;

combining the lipid and the enzymes; and collecting the modified lipid.

47. (previously presented) The method of Claim 46 wherein the lipid is a type of glyceride having the formula:

Response to Office Action of January 9, 2007

Attorney Docket: ISCAT-005A

wherein R1 is selected from the group consisting of Hydroxy, Alkyloxy, Amino, Alkylamino, Dialkylamino, Arylamino, Diaryloxy, Halogen, and Cyano; and wherein R2, R3, and R4 are selected from the group consisting of Hydrogen, Alkyl, and Aryl.

48. (cancelled)
